BMW M50 - BMW Tech

M50 engine data at the following link: M50 information Engine mounts arm of a 6 cylinder E36. If the engine is from an e36 the oil pan and pickup tube have to be changed by the ones of an M50 E34. They have to be changed because in the e34 the oil sump is in the front part (like in the e30 engines) and in the E36 the sump is in the rear part.

BMW E30 M50 Swap information - MundoSwap

About The BMW M50 Engine The straight six-cylinder petrol engines of the M50 family replaced the M20 engines in 1990. They were produced until 1995, when they were replaced by M52 engines. The main difference between the M50 engine and its predecessor is the cylinder head, which has four valves per cylinder and two camshafts.

BMW M50 Engine For Sale | Engine Finder Motor Spares

In most markets, the M52 switched from the M50's cast iron engine block to a lightweight aluminium engine block. However, in the United States and Canada, some cars (not including the Z3) retained the M50's cast iron engine block, while other cars used the new aluminum M52 block with iron sleeves.

BMW M52 - Wikipedia

BMW M50 engine is slightly heavier than M20 (around 60lbs heavier). Although 60lbs doesn't sound like much you will be able to feel it. Thicker sway bars do wonders on M50 E30s.
