Peugeot 307 - Coolant temperature issue. Hi all I've had my Peugeot 307 1.4 (2003) for a few months now, passed its MOT with no advisories last month. In the past week, I've started having a few issues. The main one is the coolant temperature. On the dash, after around 10 mins, the indicator files up to max and the STOP sign beeps on the dash.

Peugeot 307 engine overheating, cold air from heater. Help! I had a problem with my heater blowing out cold air on friday so went and had it filled with coolant. It was working fine for a few days. I have just gone to my car today (Wednesday) for the first time since Sunday and it is frozen solid.

Peugeot 307 engine overheating, cold air from heater. Help ...

Supposedly overheating of engine often happens in Peugeot, but it is an engine coolant (antifreeze) temperature sensor that gets out of the order. Firstly, as a rule, the temperature pointer starts slacking (as it is shown in the video below), then, when the sensor is completely out of order, the pointer drifts into the red zone of engine ...
